Flood Risk Management Strategy

Tay Estuary and Montrose Basin Local Plan District

This section is the most relevant for individuals, communities and businesses seeking to understand their local flood risk and its management. There is an overview of the Local Plan District, as well as further detail for every Potentially Vulnerable Area. For each Potentially Vulnerable Area, there is a short description of the causes and consequences of flooding. The agreed objectives are clearly set out and, most importantly, the actions that will deliver these objectives are prioritised and described.

2.1 Summary of flooding in the Tay Estuary and Montrose Basin Local Plan District

The Tay Estuary and Montrose Basin Local Plan District covers an area of 2,712km² with a population of approximately 340,000. The area contains five local authorities and 19 Potentially Vulnerable Areas.

Flood risk in the Tay Estuary and Montrose Basin

There are approximately 3,800 residential and 1,400 non-residential properties at risk of flooding within the Local Plan District. This equates to approximately 5% of all properties at risk of flooding nationally. Within the Local Plan District, approximately 2.5% of all residential and 9% of all non-residential properties are at risk and it is estimated that 89% of these properties are located within Potentially Vulnerable Areas. The Annual Average Damages from flooding (see glossary) are approximately £16 million.

River flooding is the main source of flood risk, followed by surface water flooding. The Annual Average Damages caused by river flooding are \pounds 6.5 million, those caused by coastal flooding are \pounds 5.3 million and those caused by surface water flooding are \pounds 4.3 million (Figure 1).

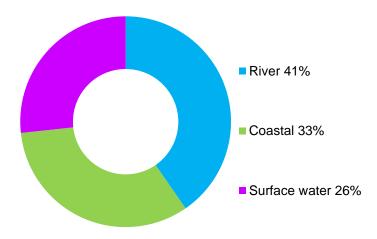

Table 1 and Figure 3 show the number of properties at risk and the Annual Average Damages caused by flooding in the main towns and cities within the Local Plan District. This includes damages to residential properties, non-residential properties, transport and agriculture. Please note that economic damages to airports and rail infrastructure were not assessed, as information on damages at this scale is not available.

	Residential and non-residential properties at risk of flooding	Annual Average Damages
Dundee (inc. Invergowrie and Broughty Ferry)	1,900	£5.1 million
Arbroath	410	£1.5 million
Cupar	280	£740,000
Monifieth	280	£680,000
Carnoustie/Barry	200	£410,000
St Andrews	200	£380,000
Montrose	190	£540,000
Brechin	160	£600,000
Newburgh	130	£450,000
Auchtermuchty	60	£200,000

Table 1: Main areas at risk of flooding¹

Background information on the Tay Estuary and Montrose Basin Local Plan District

The extent of the Tay Estuary and Montrose Basin Local Plan District and the location of the Potentially Vulnerable Areas are shown in Figure 2.

It is a relatively urbanised area (approximately 4% of land cover) with a number of large cities and towns including Dundee, Arbroath, St Andrews, Leuchars, Forfar, Carnoustie and Montrose. Across the area the main types of land cover include heather and grassland (40%), arable and horticultural land (38%), and coniferous and broadleaved woodland (9%).

The main river catchments are the Rivers North Esk and South Esk, Lunan Water, Dighty Water and the River Eden. The Local Plan District also has 233km of coastline stretching from Inverbervie in the north to Fife Ness in the south. The coastline includes the Montrose Basin, the Firth of Tay, and the Angus and Fife coastlines that are exposed to the North Sea.

Further details of flood risk from distinct sources can be found in the river, coastal and surface water sections of this report.

¹ Table 1 does not show properties at risk if they are protected by a flood protection scheme

Objectives and actions in the Tay Estuary and Montrose Basin Local Plan District

The objectives are the shared aims for managing flooding. Actions describe where and how flood risk will be managed. Objectives and actions have been set by SEPA and agreed by flood risk management responsible authorities following consultation.

Some flood risk management objectives and actions apply to all areas, whether designated as a Potentially Vulnerable Area or not. For example, flood risk can be managed through national planning policy or as part of ongoing statutory duties for local authorities. The focus of this Flood Risk Management Strategy is to manage flood risk in Potentially Vulnerable Areas where specific actions apply in addition to the generic actions listed below. Further detail on specific actions can be found in the relevant Potentially Vulnerable Area chapter. Local authorities may have further information on how they manage flooding across their area.

Target area	Objective(s)	ID	Indicators
Applies across Tay Estuary and Montrose Basin Local Plan District	Avoid an overall increase in flood risk	7001	 3,800 residential properties 1,400 non-residential properties 8,400 people
Applies across Tay Estuary and Montrose Basin Local Plan District	Reduce overall flood risk	7054	 3,800 residential properties 1,400 non-residential properties 8,400 people

Status:	Existing Indicative delivery: Ongoing										
Description:	Providing an emergency response to flooding is the responsibility of many organisations, including local authorities, the emergency services and SEPA. Effective management of an emergency response relies on emergency plans that are prepared under the Civil Contingencies Act 2004 by Category 1 and 2 Responders. The emergency response by these organisations is co-ordinated through regional and local resilience partnerships. This response may be supported by the work of voluntary organisations.

In terms of flood risk management, the policy supports a catchment- scale approach to sustainable flood risk management and aims to build the resilience of our cities and towns, encourage sustainable land management in our rural areas, and to address the long- term vulnerability of parts of our coasts and islands. Under this approach, new development in areas with medium to high likelihood of flooding should be avoided. For further information											

2.2 Potentially Vulnerable Areas

The table below summarises the actions to manage flood risk in the Potentially Vulnerable Areas of this Local Plan District. Further detail is provided in each Potentially Vulnerable Area.
