# Water body information sheet for water body 5720 in Tay

#### **General details**

Water body name: Water of Tarf

Water body Identifier code: 5720

Length: 27.04 km

Water body category: River

River basin district: Scotland

Area advisory group: Tay

Catchment: River North Esk (Tayside)

Associated protected

areas:

River North Esk - FRESHWATER FISH (EXISTING)

Associated groundwater: Killin, Aberfeldy and Angus Glens Responsible body: SEPA

Angus & Dundee

Heavily modified: No Artificial: No

Typology: Mid-altitude

Small Siliceous

National Grid Reference: NO 47118 82750

Latitude: 56.93299 Longitude: -2.87057

### **Current status of this water body**

Classification results are updated annually, as part of SEPA's commitment to monitor and assess the condition of the environment.

Once the classification is agreed, as part of river basin management planning, the pressures and measures for every water body are reviewed to ensure that they reflect this improved understanding of the environment. Objectives are reviewed as part of the six yearly planning cycle and any proposed changes to objectives will be presented in the draft river basin plans <a href="http://sepa.org.uk/water/river\_basin\_planning.aspx">http://sepa.org.uk/water/river\_basin\_planning.aspx</a>.

This worksheet was produced using the most up to date classification results but the measures, pressures and objectives shown may not yet align to these classification results. Please contact <a href="mailto:rbmp@sepa.org.uk">rbmp@sepa.org.uk</a> if you require further information on this water body.

We have classified this water body as having an overall status of High with High confidence in 2012 with overall ecological status of High and overall chemical status of Pass.

The overall classification of status is made up of many different tiers of classification data. A complete set of classification data for 2012 is shown at the end of this document.

## Targets for the future status of this water body

We have set environmental objectives for this water body over future river basin planning cycles in order that sustainable improvements to its status can be made over time, or alternatively that no deterioration in status occurs, unless caused by a new activity providing significant specified benefits to society or the wider environment.

For this water body we have set the overall environmental objectives for the first, second and third River Basin Management Planning (RBMP) cycles as:

Year	2012	2015	2021	2027
Status	High	High	High	High
Year	2012	2015	2021	2027
Status	High	Pass	Pass	Pass

## Pressures and measures on this water body

We have established an ongoing programme of monitoring in order to identify pressures on our water bodies.

Water body information sheet for water body 5720 in Tay

There are currently no pressures identified on this water body; we must ensure that no deterioration from good status occurs, unless caused by a new activity providing significant specified benefits to society or the wider environment

#### **Future work**

Additional work to identify pressures and to develop and implement measures to mitigate their impacts will continue over subsequent river basin cycles.

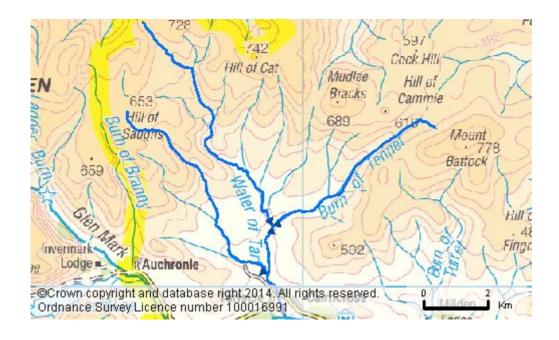

## Complete classification for this water body in 2012

Parameter	Status	Confidence of Class
OVERALL STATUS	HIGH	HIGH
Pre-HMWB status	High	High
Overall chemistry	Pass	Low
Priority substances	Pass	Low
Overall ecology	High	High
Physico-Chem	High	High
Temperature	High	High
Soluble reactive phosphorus	High	Low
рН	High	High
Dissolved Oxygen	High	High
Biological elements	High	High
Phytobenthos	High	Low
Macrophytes	High	Low
Benthic invertebrates	High	High
Macro-invertebrates (acid)	High	Low
Macro-invertebrates (RiCT)	High	High
Macro-invertebrates (ASPT)	High	High
Macro-invertebrates (NTAXA)	High	High
Alien species	High	Low
Fish	High	Medium

Parameter	Status	Confidence of Class	
Fish ecology	High	Low	
Fish barrier	High	Medium	
Specific pollutants	Pass	High	
Ammonium	Pass	Low	
Hydromorphology	High	Medium	
Morphology	High	Medium	
Hydrology	High	Medium	
Hydrology (impoundment)	High	Medium	
Hydrology (abstraction)	High	Medium	
Regulatory BOD	High	High	
Regulatory ammonium	High	High	
Water quality	High	High	
Morphological pressures	High	Medium	

# Location of this water body

You can find the geographical location of this water body by searching on water body ID in the interactive maps at <a href="https://www.sepa.org.uk/water/river\_basin\_planning.aspx">www.sepa.org.uk/water/river\_basin\_planning.aspx</a>
